

Thank you very much for the updates. I'm so happy that we are making progress with so much work done by you. You're an angel from heaven. I'm also very happy that a leader has been spotted so that this thing could get on the way. I'm so sorry and sometimes feel bad when I'm unable to attend meetings, widely because of the job I have and moreover now I'm continuing my classes at the college this semester pursuing my associates in business administration. So I don't want to portray an image of negligence towards this much needed program. I support it 100% and will try my outmost best in any way possible. Continue your beautiful work here even though sometimes it might become a little tiresome or frustrating and even facing resistance. God is with you especially in trying to shape our youth for the future.'

God bless you Marianne
